

# IMPORTANT!

## Call notification of night spray mosquito control applications will now be by text or email.

This season, residents desiring such advance notification of public health night mosquito control applications will need to select **TEXT** or **EMAIL** notification by registering on the new Clarke\* Portal. ***Phone call notifications are being discontinued.***

### How to make this change:

- » Simple. Go to [www.clarkeportal.com](http://www.clarkeportal.com)
- » Select **Register** at the bottom of the form.
- » Select **I AM A RESIDENT** and complete the form.
- » Create your own **password** (remember it!). You will be sent a confirming email. Once you open that email you will be able to log in and choose your notification preferences.

\*Clarke is the mosquito control service provider for your community, thus manage all advance notifications as well.

### Is this the only time I'll be notified of this change?

- » No. We will be making **three autodial calls** prior to the season notifying our current call list of this change. They will be provided simple instructions on what to do.
- » We will also make **two postcard mailings** as well.
- » If you do not sign up for text or email notification you will not be notified of applications.
