PREFACE

This Code constitutes a complete codification of the ordinances of a general and permanent nature enacted by the President and Board of Trustees and is the first such codification for the Village of Durand since 1941.

As expressed in the Adopting Ordinance, this Code supersedes all ordinances not included herein or expressly saved from repeal by the Adopting Ordinance. The Code contains only ordinances of a general and permanent nature, prescribed for and affecting the public as a whole. Special ordinances or ordinances dealing with only a portion of the inhabitants of the Village, rather than all of them, or relating to special purposes, such as ordinances levying special assessments, providing for bond issues, paving, vacating and opening specified streets, etc., are not included herein. For a more specific enumeration of the types of ordinances which are not included herein, see Ordinance 1996-1 of the Adopting Ordinance.

The chapters of the Code have been conveniently arranged in alphabetical order and the various sections within each chapter have been appropriately catch lined to facilitate usage. Appropriate footnotes which tie related sections of the Code together and which refer to relevant state laws have been included. Also, the source of each section is included in the history note appearing in parentheses at the end thereof. The absence of such a note indicates that the section is new and was adopted for the first time with the adoption of the Code.

The numbering system used in this Code is the same system used in many state and municipal codes. Each section number consists of two parts separated by a dash, the figure before the dash referring to the chapter number and the figure after the dash referring to the position of the section within the chapter. Thus, the first section of Chapter 1 is number 1-1 and the thirtieth section of Chapter 4 is 4-30. Under this system, each section is identified by its chapter, and, at the same time, new sections may be inserted in their proper places, simply by using the decimal system for amendments. By way of illustration: If it is desired to add new material consisting of three sections that would logically come between sections 5-4 and 5-5, such new sections would be numbered 5-4.1, 5-4.2 and 5-4.3.

New chapters may be included by the addition of a fraction after the chapter number. For example, if the new material is to be included between Chapters 12 and 13, it will be designated as Chapter 12 1/2. Care should be taken that the alphabetical arrangement of chapters is maintained when including new chapters. New articles and new divisions may be included in the same way, or in the case of articles, may be placed at the end of the chapter embracing the subject and in the case of division may be placed at the end of the article embracing the subject, the next successive number being assigned to the article or division.

A special feature of this Code is the loose-leaf system of binding and supplemental servicing. With this loose-leaf system, the Code will be kept up-to-date periodically. Upon the final passage of amendatory ordinances, they will be properly edited and the page or pages affected will be reprinted. These new pages will be distributed to the holders of the Codes with instructions for the manner of inserting the new pages and deleting the obsolete pages. Each such amendment, when incorporated into the Code, may be cited as a part thereof as provided in Section 4 of the Adopting Ordinance.

The successful maintenance of this Code up-to-date at all times will depend largely upon the holder of the volume. As revised sheets are received it will become the responsibility of the holder to have the amendments inserted according to the attached instructions. It is strongly recommended by the publishers that all such amendments be inserted immediately upon receipt to avoid misplacing them, and that all deleted pages be saved and filed for historical reference.

The general index of the Code has been prepared with the greatest of care. Each item has been placed under several headings, some of the headings being couched in lay phraseology, others in legal terminology, and still others in language generally used by city officials and employees. There are numerous cross-references within the index which stand as guideposts to direct the user to the particular item in which he is interested.

The citizens of Durand are most grateful to Mr. Herbert I. Greene, Village Attorney; Mr. Jeff Anderson, Police Sergeant; Mr. Robert Corwin, Chief of Police; Miss Lori Hardie, Office Associate; and Mrs. Charlotte Miller, Administrative Assistant for their cooperation and interest during the progress of the work on this Code.

This Code is presented for the use and benefit of the citizens of the Village of Durand, Illinois.

i) **VILLAGE PRESIDENT**

BOARD OF TRUSTEES

The provisions of this Article shall be deemed to be requirements in addition to said general standards, provided, however, that where there is a conflict between the provisions of this Article and the provisions of another Article or Chapter, the provisions set forth in this Article shall be deemed to supersede any such conflicting provision as it pertains to the installation, maintenance, or repair of a solar energy system.

Sec. 7-103. Roof-Mounted PV Arrays.

- A. In addition to the general design standards applicable to all installations of structural or electrical components in the Village of Durand, roof mounted PV arrays shall further comply with the following design and installation requirements set forth in this section.
- B. No roof-mounted PV array shall be constructed in a manner which creates an increased risk of falling ice or snow, or which causes water to follow directly from any panel to ground level.
- C. For purposes of this section, a "pitched roof" shall be any roof with an angle of more than 12.00 degrees inclination as measured from the horizon. "Flat roof" shall be defined as any roof with an angle of 12.00 degrees or lower.

- iii. Ballasted roof-mounted PV arrays may be used provided that the structure on which they are to be located is structurally sufficient to support the added load stresses, including dead load, wind load, and rain/snow loads.
- E. Setbacks and Pathways. All roof-mounted PV arrays shall observe setbacks and provide structurally supported, unobstructed pathways in accordance with this subsection.
- a. Pitched roof installations - large. Where the total coverage of a PV array exceeds 1,000 square feet on any building with a pitched roof:

 - b. Pitched roof installations - small. Where the total coverage of a PV array does not exceed 1,000 square feet on any building with a pitched roof:
 - i. If the total coverage of the PV array is less than twenty-five percent of the total area of the roof area of the structure, a minimum of a twelve-inch unobstructed pathway shall be maintained along any horizontal ridge, and along any roof edge as measured from the nearest edge of the roof to the solar array or mounting apparatus.
 - ii. If the total coverage area of the PV array is twenty-five percent or more of the total area of the roof area of the structure, a minimum of a twelve-inch unobstructed pathway shall be maintained along any horizontal ridge, and along any roof edge as measured from the nearest edge of the roof to the solar array or mounting apparatus. A minimum thirty-six inch unobstructed pathway shall be provided from ridge to eave on any roof face on which a PV array is installed.
 - c. Flat roof installations. On any building with a flat roof:

Inside and rear yards, any ground mounted PY array shall be set back a minimum of ten feet from any property line.
- D. Drainage. No ground mounted PY array shall be constructed in a manner which increases drainage flow to any adjacent property. If the applicant provides a written report from a qualified professional engineer which indicates that the proposed installation will not increase water flow rates from the applicant's property, this requirement shall be deemed satisfied for purposes of issuance of the permit only.
- E. Historic Districts. No ground mounted PY array shall be installed in a Historic District.
- F. Solar Canopies. A solar canopy shall not be deemed a ground mounted PY array for purposes of these ordinances.

Sec. 7-105. Building-Mounted PV Arrays.

- B. In the event the Village of Durand, or its designee, denies any application, the Village of Durand, or its designee, may either deny the application outright, or in the alternative, may require alterations or additions to the proposed site plan or application to address any such issues. In either such case, the Village of Durand, or its designee, shall provide written findings indicating the reasons for the denial, and the revisions or remedies to the proposed installation, if any, which it deems necessary in order to allow a permit to issue.
- C. Any decision to approve or deny an application, or requiring modifications to the site plan as a condition to approval, shall be provided to the applicant within fourteen days of (a) submission of the completed application or (b) the date of the public meeting if required by Section 7-109(b) in the case of a large scale solar system.

 - c. Ensure that any approved lighting is maintained in operating condition.

Sec. 7-112. Solar Access.

In order to preserve access to solar resources by all residents, the following provisions restrict the construction of structures on adjacent lots which may cause a significant decrease in the amount of available sunlight to a particular lot.

- A. Solar Access Areas. Two solar access areas are hereby established as defined below. The purpose of dividing the Village into solar access areas is to provide solar access protection for each area of the Village consistent with planned densities, topography, and lot configuration and orientations.

- a. Solar access area I (SA-1)- SA-I is designed to protect solar access principally for residential areas where, because of planned density, topography or lot configurations or orientations, the preponderance of lots therein currently enjoys such access and where solar access of this nature would not unduly restrict permissible development. SA-I includes all property in all Residential, Professional Use, and Agricultural Districts.
- b. Solar access area II (SA-2) - SA-2 is designed to protect solar access principally for rooftops in areas where, because of planned density, topography or lot configuration or orientation, the preponderance of lots therein currently enjoys such access and where solar access of this nature would not unduly restrict permissible development. SA-2 includes all property not included in SA-I.

B. Solar Access Protection.

- a. Solar fence. A solar fence is hereby hypothesized for each lot located in the Village. Each solar fence completely encloses the lot in question, and its foundation is contiguous with the lot lines. Such fence is vertical, is opaque and lacks any thickness. Said concept shall be applied to all calculations required by this section. The term – solar fence – as used throughout this section shall refer to such hypothetical fence specifically as described in this subsection.
- b. No person shall erect an object or structure on any other lot that would shadow a protected lot in SA- I to a greater degree than the lot would be shaded by a solar fence twelve feet in height, between two hours before and two hours after local solar noon on a clear winter solstice day.
- c. No person shall erect an object or structure on any other lot that would shade a protected lot in SA-2 to a greater degree than the lot would be shaded by a solar fence twenty-five feet in height, between two hours before and two hours after local solar noon on a clear winter solstice day.
- d. Maximum height. Notwithstanding anything to the contrary contained herein, nothing in this section prevents a structure in SA-1 from being erected up to a height of twenty-five feet, or a structure in SA-2 from being erected up to a height of thirty-five feet, if located within the allowed buildable area of the lot.
- e. Any application for a variance of any requirement of this section shall include, in addition to the requirements for variations generally as set forth in these Codified Ordinances, the following:
 - i. A graphic representation showing the shadows that would be cast by the proposed structure between two hours before and two hours after local solar noon on a clear winter solstice day;
 - ii. The solar fences on all lots that the shadows would touch;
 - iii. All possible obstructions of solar access protected by permit; and

- iv. Provide additional information as may be required by the Village of Durand or its designee.
- f. Existing structures. A structure in existence on the date of establishment of an applicable solar access area, or structures and vegetation in existence on the date of issuance of an applicable solar access permit, are exempt from the application of this section. For purposes of this section, structures are deemed to be in existence on the date of issuance of a development permit authorizing its construction.
- g. Temporary solar obstructions. Unavoidable temporary obstructions of protected solar access necessitated by construction activities or other necessary and lawful purposes are exempt to the extent that they do not exceed ten days in any three month period and thirty days in any year.
- h. Solar analysis. When a solar analysis is required for any review process, it shall be prepared in compliance with the methods described in materials provided by the Village of Durand or its designee.

Sec. 7-113. Licensed Contractors.

No work shall be performed on any solar energy system, no any component thereof, by any person who is not a licensed commercial contractor. (Ord. 2020-4; 4/30/20)

After having stopped, the operator of the snowmobile shall yield the right-of-way to any vehicle which has entered the intersection from another roadway or which is approaching so closely on the roadway as to constitute an immediate hazard during the time when the operator is moving across or within the intersection, but said operator having so yielded may proceed at such time as a safe interval occurs.

Section 5-17. **Snowmobile Entering a Yield Intersection** - The operator of a snowmobile approaching a yield sign shall in obedience to such signs slow down to a speed reasonable for the existing conditions and if required for safety, to stop, shall stop at a clearly marked line, but if none, before entering the crosswalk on the near side of the intersection, or if none, then at the point nearest the intersecting roadway where the operator has a view of approaching traffic on the intersecting roadway. After slowing or stopping, the operator shall yield the right-of-way to any vehicle in the intersection or approaching on another roadway so closely as to constitute an immediate hazard during the time such operator is moving across or within the intersection. If a snowmobile is involved in a collision at an intersection or interferes with the movement of other vehicles after driving past the yield right-of-way sign, such collision or interference shall be deemed prima facie evidence of the driver's failure to yield right-of-way.

Section 5-18. Obedience to Traffic Control Devices.

- a. The operator of any snowmobile shall obey the instructions of any official traffic control device applicable thereto placed in accordance with the provisions of this act and it shall be unlawful for any snowmobile operator to leave the roadway and travel across private property to avoid an official traffic control device.

 - b. A suspended solids content of 240 mg/l.

The basic user charge shall be computed as follows:

- a. Estimate the annual wastewater volume, pounds of BOD and pounds of SS to be treated.
 - b. Estimate the projected annual revenue required to operate and maintain the wastewater facilities for the year, for all works categories.
 - c. Proportion the estimated O&M costs to each user class by volume, BOD and SS.
 - d. Proportion the estimated O&M costs to wastewater facility categories by volume, BOD and SS.
 - e. Compute costs per 1,000 gallons for normal domestic strength sewage.
 - f. Compute charges for each class of user based on estimated sewage volume.

- C. The **Debt Service Charge** is computed by apportioning the annual debt service as a fixed charge per billing period.
- D. A **Surcharge** will be levied to all users whose water exceed the normal domestic concentrations of BOD (200 mg/l) and SS (240 mg/l). The surcharge will be based on water usage as recorded by water meters or sewage meters for all wastes which exceed these concentrations for those users having such meters.

The concentration of wastes used for computing surcharges shall be established by waste sampling. Waste sampling shall be performed as often as may be deemed necessary by the Village of Durand and shall be binding as a basis for surcharges.

1. To prevent unwise developments from increasing flood or drainage hazards to others;
2. To protect new buildings and major improvements to buildings from flood damage;
3. To lessen the burden on the taxpayer for flood control, repairs to public facilities and utilities, as well as flood rescue and relief operations;
4. To maintain property values and a stable tax base by minimizing the potential for creating blight areas;
5. To make federally subsidized flood insurance available, and
6. To preserve the natural characteristics and functions of watercourses and floodplains in order to moderate flood and storm water impacts, improve water quality, reduce soil erosion, protect aquatic and riparian habitat, provide recreational opportunities, provide aesthetic benefits and enhance community and economic development.

Sec. 20-2. Definitions.

For the purposes of this ordinance, the following definitions are adopted:

Base Flood. The flood having a one-percent (1%) probability of being equaled or exceeded in any given year. The base flood is also known as the 100-year flood. The base flood elevation at any location is as defined in Section 3 of this ordinance.

Base Flood Elevation (BFE). The elevation in relation to mean sea level of the crest of the base flood.

Basement. That portion of a building having its floor sub-grade (below ground level) on all sides.

Building. A walled and roofed structure, including gas or liquid storage tank, that is principally above ground, including manufactured homes, prefabricated buildings and gas or liquid storage tanks. The term also includes recreational vehicles and travel trailers installed on a site for more than one hundred eighty (180) days per year.

Critical Facility. Any facility which is critical to the health and welfare of the population and, if flooded,

would create an added dimension to the disaster. Damage to these critical facilities can impact the delivery of vital services, can cause greater damage to other sectors of the community, or can put special populations at risk.

Examples of critical facilities where flood protection should be required include: emergency services facilities (such as fire and police stations), schools, hospitals, retirement home and senior care facilities, major roads and bridges, critical utility sites (telephone switching stations or electrical transformers), and hazardous material storage facilities (chemicals, petrochemicals, hazardous or toxic substances).

Development. Any man-made change to real estate including, but not necessarily limited to:

1. Demolition, construction, reconstruction, repair, placement of a building, or any structural alteration to a building;
2. Substantial improvement of an existing building;
3. Installation of a manufactured home on a site, preparing a site for a manufactured home, or installing a travel trailer on a site for more than one hundred eighty (180) days per year;

7. Storage of materials including the placement of gas and liquid storage tanks; and
8. Channel modifications or any other activity that might change the direction, height, or velocity of flood or surface waters.

“**Development**” does not include routine maintenance of existing buildings and facilities; resurfacing roads; or gardening, plowing, and similar practices that do not involve filling, grading, or construction of levees.

Existing Manufactured Home Park or Subdivision. A manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed or buildings to be constructed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the floodplain management regulations adopted by a community.

Expansion to an Existing Manufactured Home Park or Subdivision. The preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

Flood Fringe. That portion of the floodplain outside of the regulatory floodway.

Flood Insurance Rate Map. A map prepared by the Federal Emergency Management Agency that depicts the floodplain or special flood hazard area (SFHA) within a community. This map includes insurance rate zones and may or may not depict floodways and show base flood elevations.

Flood Insurance Study. An examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations.

Floodplain and Special Flood Hazard Area (SFHA). These two terms are synonymous. Those lands within the jurisdiction of the Village of Durand, the extraterritorial jurisdiction of the Village of Durand, or that may be annexed into the Village of Durand that are subject to inundation by the base flood. The floodplains of the Village of Durand are generally identified as such on panel number(s) 0079D, 0083D and 0087D of the countywide Flood Insurance Rate Map of Winnebago County prepared by the Federal Emergency Management Agency and dated September 6, 2006. Floodplain also includes those areas of known flooding as identified by the community.

The floodplains of those parts of unincorporated Winnebago County that are within the extraterritorial jurisdiction of the Village of Durand or that may be annexed into the Village of Durand are generally identified as such on the Flood Insurance Rate map prepared for Winnebago County by the Federal Emergency Management Agency and dated September 6, 2006.

Floodproofing. Any combination of structural or non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate, property and their contents.

Floodproofing Certificate. A form published by the Federal Emergency Management Agency that is used to certify that a building has been designed and constructed to be structurally dry floodproofed to the flood protection elevation.

Flood Protection Elevation (FPE). The elevation of the base flood plus one foot of freeboard at any given location in the floodplain.

Floodway. That portion of the floodplain required to store and convey the base flood. The floodway for the floodplains of Otter Creek shall be as delineated on the countywide Flood Insurance Rate Map of Winnebago County prepared by FEMA and dated September 6, 2006. Lowest Floor. The lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of Section 7 of this ordinance

Manufactured Home. A structure transportable in one or more sections, that is built on a permanent chassis and is designed to be used with or without a permanent foundation when connected to required utilities.

Manufactured Home Park or Subdivision. A parcel (or contiguous parcels) of land divided into two or more lots for rent or sale.

Repetitive Loss. Flood related damages sustained by a structure on two separate occasions during a ten-year period for which the cost of repairs at the time of each such flood event on the average equals or exceeds twenty-five percent (25%) of the market value of the structure before the damage occurred.

SFHA. See definition of floodplain.

Start of Construction. Includes substantial improvement and means the date the building permit was issued. This, provided the actual start of construction, repair, reconstruction, rehabilitation, addition placement or other improvement, was within one hundred eighty (180) days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns or any work beyond the stage of excavation or placement of a manufactured home on a foundation. For a substantial improvement, actual start of construction means the first alteration of any wall, ceiling, floor or other structural part of a building whether or not that alteration affects the external dimensions of the building.

Structure. See “Building.”

Substantial Damage. Damage of any origin sustained by a structure whereby the cumulative percentage of damage during the life of the building equals or exceeds fifty percent (50%) of the market value of the structure before the damage occurred regardless of actual repair work performed. Volunteer labor and materials must be included in this determination. The term includes “Repetitive Loss Buildings” (see definition).

Substantial Improvement. Any reconstruction, rehabilitation, addition or improvement of a structure, taking place during the life of the building in which the cumulative percentage of improvements:

1. Equals or exceeds fifty percent (50%) of the market value of the structure before the improvement or repair is started, or
2. Increases the floor area by more than twenty percent (20%).

“Substantial improvement” is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term includes structures which have incurred repetitive loss or substantial damage, regardless of the actual repair work done.

The term does not include:

1. Any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions, or
2. Any alteration of a structure listed on the National Register of Historic Places or the Illinois Register of Historic Places.

Violation. The failure of a structure or other development to be fully compliant with the community's floodplain management regulations. A structure or other development without the required federal, state and/or local permits and elevation certification is presumed to be in violation until such time as the documentation is provided.

Sec. 20-3. Base Flood Elevation.

This ordinance's protection standard is the base flood. The best available base flood data are listed below. Whenever a party disagrees with the best available data, the party shall finance the detailed engineering study needed to replace the existing data with better data and submit it to the FEMA and IDNR/OWR for approval prior to any development of the site:

1. The base flood elevation for the floodplains of Otter Creek shall be as delineated on the 100-year flood profiles in the countywide Flood Insurance Study of Winnebago County prepared by the Federal Emergency Management Agency and dated September 6, 2006.
2. The base flood elevation for each floodplain delineated as an "AH Zone" or "AO Zone" shall be that elevation (or depth) delineated on the countywide Flood Insurance Rate Map of Winnebago County.
3. The base flood elevation for each of the remaining floodplains delineated as an "A Zone" on the countywide Flood Insurance Rate Map of Winnebago County shall be according to the best data available from federal, state or other sources. Should no other data exist, an engineering study must be financed by the applicant to determine base flood elevations.
4. The base flood elevation for the floodplains of those parts of unincorporated Winnebago County that are within the extraterritorial jurisdiction of the Village of Durand, or that may be annexed into the Village of Durand, shall be as delineated on the 100-year flood profiles in the Flood Insurance Study of Winnebago County prepared by the Federal Emergency Management Agency and dated September 6, 2006.

Sec. 20-4. Duties of the Superintendent of Public Works.

The Superintendent of Public Works shall be responsible for the general administration of this ordinance and ensure that all development activities within the floodplains under the jurisdiction of the Village of Durand meet the requirements of this ordinance. Specifically, the Superintendent of Public Works shall:

- A. Process development permits in accordance with Section 5;
- B. Ensure that all development in a floodway (or a floodplain with no delineated floodway) meets the damage prevention requirements of Section 6;
- C. Ensure that the building protection requirements for all buildings subject to Section 7 are met and maintain a record of the "as-built" elevation of the lowest floor (including basement) or floodproof certificate;
- D. Assure that all subdivisions and annexations meet the requirements of Section 8;

- E. Ensure that water supply and waste disposal systems meet the Public Health standards of Section 9;
- F. If a variance is requested, ensure that the requirements of Section 11 are met and maintain documentation of any variances granted;
- G. Inspect all development projects and take any and all penalty actions outlined in Section 13 as necessary to ensure compliance with this ordinance;
- H. Assure that applicants are aware of and obtain any and all other required local, state, and federal permits;
- I. Notify IDNR/OWR and any neighboring communities prior to any alteration or relocation of a watercourse;
- J. Provide information and assistance to citizens upon request about permit procedures and floodplain construction techniques;
- K. Cooperate with state and federal floodplain management agencies to coordinate base flood data and to improve the administration of this ordinance;
- L. Maintain for public inspection base flood data, floodplain maps, copies of state and federal permits, and documentation of compliance for development activities subject to this ordinance;
- M. Perform site inspections to ensure compliance with this ordinance and make substantial damage determinations for structures within the floodplain, and
- N. Maintain the accuracy of floodplain maps including notifying IDNR/OWR and/or submitting information to FEMA within six (6) months whenever a modification of the floodplain may change the base flood elevation or result in a change to the floodplain map.

Sec. 20-5. Development Permit.

No person, firm, corporation, or governmental body not exempted by law shall commence any development in the floodplain without first obtaining a development permit from the Superintendent of Public Works. The Superintendent of Public Works shall not issue a development permit if the proposed development does not meet the requirements of this ordinance.

- A. The application for a development permit shall be accompanied by:
 - 1. Drawings of the site, drawn to scale showing property line dimensions;
 - 2. Existing grade elevations and all changes in grade resulting from excavation or filling;
 - 3. The location and dimensions of all buildings and additions to buildings;
 - 4. The elevation of the lowest floor (including basement) of all proposed buildings subject to the requirements of Section 7 of this ordinance, and

5. Cost of project or improvements as estimated by a licensed engineer or architect. A signed estimate by a contractor may also meet this requirement.
- B. Upon receipt of an application for a development permit, the Superintendent of Public Works shall compare the elevation of the site to the base flood elevation. Any development located on land that can be shown by survey data to have been higher than the current base flood elevation and which has not been filled after the date of the site's first Flood Insurance Rate Map is not in the floodplain and therefore not subject to the requirements of this ordinance. Conversely, any development located on land shown to be below the base flood elevation and hydraulically connected, but not shown on the current Flood Insurance Rate Map, is subject to the provisions of this ordinance.

The Superintendent of Public Works shall maintain documentation of the existing ground elevation at the development site and certification that this ground elevation existed prior to the date of the site's first Flood Insurance Rate Map identification.

The Superintendent of Public Works shall be responsible for obtaining from the applicant copies of all other federal, state, and local permits, approvals or permit-not-required letters that may be required for this type of activity. The Superintendent of Public Works shall not issue a permit unless all other federal, state, and local permits have been obtained.

Sec. 20-6. Preventing Increased Flood Heights and Resulting Damages.

Within any floodway identified on the countywide Flood Insurance Rate Map, and within all other floodplains where a floodway has not been delineated, the following standards shall apply:

- A. Except as provided in Section 20-6. (B) of this ordinance, no development shall be allowed which, acting in combination with existing and anticipated development will cause any increase in flood heights or velocities or threat to public health and safety. The following specific development activities shall be considered as meeting this requirement:

All temporary construction materials must be removed from the stream and floodway within one year of their placement and the area returned to the conditions existing prior to the beginning of construction. Any desired subsequent or repetitive material placement shall not occur without the review and approval of the IDNR/OWR.
 - iii. The temporary project shall be constructed such that it will not cause erosion or damage due to increases in water surface profiles to adjacent properties. For locations where there are structures in the upstream floodplain, the temporary project shall be constructed such that all water surface profile increases, due to the temporary project, are contained within the channel banks.

Sec. 20-8. Subdivision Requirements.

The Village of Durand Board of Trustees shall take into account hazards, to the extent that they are known, in all official actions related to land management, use and development.

- A. New subdivisions, manufactured home parks, annexation agreements, planned unit developments, and additions to manufactured home parks and subdivisions shall meet the damage prevention and building protections standards of Sections 20-6 and 20-7 of this ordinance. Any proposal for such development shall include the following data:

Streets, blocks, lots, parks and other public grounds shall be located and laid out in such a manner as to preserve and utilize natural streams and channels. Wherever possible, the floodplains shall be included within parks or other public grounds.

Sec. 20-9. Public Health and Other Standards.

- A. Public health standards must be met for all floodplain development. In addition to the requirements of Sections 20-6 and 20-7 of this ordinance, the following standards apply:
 - a. No development in the floodplain shall include locating or storing chemicals, explosives, buoyant materials, flammable liquids, pollutants, or other hazardous or toxic materials below the flood protection elevation unless such materials are stored in a floodproofed and anchored storage tank and certified by a professional engineer or in a floodproofed building constructed according to the requirements of Section 20-7 of this ordinance.

- b. Public utilities and facilities such as sewer, gas and electric shall be located and constructed to minimize or eliminate flood damage.
- c. Public sanitary sewer systems and water supply systems shall be located and constructed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters.

- e. Construction of new or substantially improved critical facilities shall be located outside the limits of the floodplain. Construction of new critical facilities shall be permissible within the floodplain if no feasible alternative site is available. Critical facilities constructed within the SFHA shall have the lowest floor (including basement) elevated or structurally dry proofed to the 500-year flood frequency elevation or three feet above the level of the 100-year flood frequency elevation whichever is greater. Floodproofing and sealing measures must be taken to ensure that toxic substances will not be displaced by or released into floodwaters. Access routes elevated to or above the level of the base flood elevation shall be provided to all critical facilities.
- f. All other activities defined as development shall be designed so as not to alter flood flows or increase potential flood damages.

Sec. 20-10. Carrying Capacity and Notification.

For all projects involving channel modification, fill, or stream maintenance (including levees), the flood carrying capacity of the watercourse shall be maintained.

In addition, the Village of Durand shall notify adjacent communities in writing thirty (30) days prior to the issuance of a permit for the alteration or relocation of the watercourse.

Sec. 20-11. Variances.

Whenever the standards of this ordinance place undue hardship on a specific development proposal, the applicant may apply to the Village of Durand Zoning Board of Appeals for a variance. The Village of Durand Zoning Board of Appeals shall review the applicant's request for a variance and shall submit its recommendation to the Village of Durand Board of Trustees. The Village of Durand Board of Trustees may attach such conditions to granting of a variance as it deems necessary to further the intent of this ordinance.

- A. No variance shall be granted unless the applicant demonstrates that all of the following conditions are met:
 - a. The development activity cannot be located outside the floodplain.
 - b. An exceptional hardship would result if the variance was not granted.

- c. The relief requested is the minimum necessary.
 - d. There will be no additional threat to public health, safety or creation of a nuisance.
 - e. There will be no additional public expense for flood protection, rescue or relief operations policing, or repairs to roads, utilities, or other public facilities.
 - f. The applicant's circumstances are unique and do not establish a pattern inconsistent with the intent of the NFIP, and
 - g. All other state and federal permits have been obtained.
- B. The Village of Durand Zoning Board of Appeals shall notify an applicant in writing that a variance from the requirements of the building protections standards of Section 20-7 that would lessen the degree of protection to a building will:
- a. Result in increased premium rates for flood insurance up to twenty-five dollars (\$25.00) per one hundred dollars (\$100.00) of insurance coverage;
 - b. Increase the risk to life and property, and
 - c. Require that the applicant proceed with knowledge of these risks and the applicant acknowledge in writing the assumption of the risk and liability.
- C. Variances to the building protection requirements of Section 20-7 of this ordinance which are requested in connection with reconstruction, repair, or alteration of a historic site or historic structure as defined in "Historic Structures", may be granted using criteria more permissive than the requirements of Sections 20-6 and 20-7 of this ordinance subject to the conditions that:
- a. The repair or rehabilitation is the minimum necessary to preserve the historic character and design of the structure.
 - b. The repair or rehabilitation will not result in the structure being removed as a certified historic structure.

Sec. 20-12. Disclaimer of Liability.

The degree of protection required by this ordinance is considered reasonable for regulatory purposes and is based on available information derived from engineering and scientific methods of study. Larger floods may occur or flood heights may be increased by man-made or natural causes. This ordinance does not imply that development either inside or outside of the floodplain will be free from flooding or damage. This ordinance does not create liability on the part of the Village of Durand or any officer or employee thereof for any flood damage that results from proper reliance on this ordinance or any administrative decision made lawfully thereunder.

Sec. 20-13. Penalty.

Failure to obtain a permit for development in the floodplain or failure to comply with the conditions of a

permit or a variance shall be deemed to be a violation of this ordinance. Upon due investigation, the Superintendent of Public Works may determine that a violation of the minimum standards of this ordinance exists. The Superintendent of Public Works shall notify the owner in writing of such violation.

A. If such owner fails after ten (10) days' notice to correct the violation:

- a. The Village of Durand shall make application to the circuit court for an injunction requiring conformance with this ordinance or make such other order as the court deems necessary to secure compliance with the ordinance.
- b. Any person who violates this ordinance shall upon conviction thereof be fined not less than fifty dollars (\$50) or more than seven hundred fifty (\$750) for each offense.
- c. A separate offense shall be deemed committed upon each day during or on which a violation occurs or continues, and
- d. The Village of Durand shall record a notice of violation on the title of the property.

B. The Superintendent of Public Works shall inform the owner that any such violation is considered a willful act to increase flood damages and therefore may cause coverage by a Standard Flood Insurance Policy to be suspended.

The Superintendent of Public Works is authorized to issue an order requiring the suspension of the subject development. The stop-work order shall be in writing, indicate the reason for the issuance, and shall order the action, if necessary, to resolve the circumstances requiring the stop-work order. The stop--work order constitutes a suspension of the permit.

No site development permit shall be permanently suspended or revoked until a hearing is held by the Village of Durand Zoning Board of Appeals. Written notice of such hearing shall be served on the permittee and shall state:

1. The grounds for the complaint, reasons for suspension or revocation, and
2. The time and place of the hearing.

At such hearing the permittee shall be given an opportunity to present evidence on their behalf. At the conclusion of the hearing, the Village of Durand Zoning Board of Appeals shall determine whether the permit shall be suspended or revoked.

C. Nothing herein shall prevent the Village of Durand from taking such other lawful action to prevent or remedy any violations. All costs connected therewith shall accrue to the person or persons responsible.

Sec. 20-14. Abrogation and Greater Restrictions.

This ordinance repeals and replaces other ordinances adopted by the Village of Durand to fulfill the requirements of the National Flood Insurance Program including the Flood Plain ordinance, Ordinance No.: 1999-6 adopted and passed on May 24, 1999.

However, this ordinance does not repeal the original resolution or ordinance adopted to achieve eligibility in the Program. Nor does this ordinance repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. Where this Ordinance and other ordinance easements, covenants, or deed restrictions conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

Sec. 20-15. Separability.

The provisions and sections of this ordinance shall be deemed separable and the invalidity of any portion of this ordinance shall not affect the validity of the remainder.

Sec. 20-16. Effective Date.

This ordinance shall be in full force and effect from and after its passage and approval and publication, as required by law. **(Ord. No. 2006-8; 8/14/06)**

CHAPTER 22

RECOVERY OF VILLAGE COSTS

Sec. 22-1. Scope.

Every petition filed and to be processed that requires the village to incur professional fees and expenses shall be subject to the requirements set forth in this chapter. The recovery of professional fees and expenses shall be in addition to any and all other filing fees and other charges established by the village. No petition subject to this chapter shall be placed on the agenda for any board or committee until the petitioner has complied with this section. Notwithstanding the foregoing, the village board may consider a request for a reduction or waiver of the escrow required under this section prior to the creation of the escrow account.

Sec. 21-2. Definitions.

2. Require negotiation or discussion with the professional staff of the village, including, but not limited to the village attorney, village engineer or village planners or;
3. Require the creation of a special service area under the current or future provisions of any applicable village, county or state ordinance, statute, regulation or law or;

PROFESSIONAL FEES AND EXPENSES:

Includes and refers to any and all fees, costs, expenses or other charges incurred by the village in the process of reviewing any petition, including, without limitation, the costs associated with professional review, discussion and/or negotiation of the petition and related permits, plans and other documents by the village attorney, engineer, planner and/or other professional and including all costs or expenses otherwise incurred by the village in association therewith, including, but not limited to, administrative expenses of the village. Costs of inspection will include village's cost for any equipment and material involved, including staffing and administrative expenses associated with distributing materials related to the petition, copying or preparing such materials, administering escrow accounts or otherwise related to the petition. Fees for village employees shall be based on hourly rates reflecting the actual time spent on the project by the village employees, with hourly rates for the same to be fixed from time to time by separate resolution of the village board of trustees.

Professional fees and expenses may also include, as appropriate, the costs of court reporters, copy reproduction, document recordation, mailing costs, title searches and such other costs as shall be incurred by the village due to the filing of the petition or of the activity proposed by the petition. All such fees, costs, and expenses are also herein referred to as Recoverable Costs.

Sec. 22-3. Responsibility for Payment of Recoverable Costs; Lien.

The owner(s) of the property that is the subject of the petition and, if different, the petitioner(s), shall be jointly and severally liable for the payment of recoverable costs. By signing the petition, the owner(s) or petitioner(s) shall be deemed to have agreed to pay, and to have consented to all of the provisions of this chapter including the right of the village to file a lien against the subject property for all amounts unpaid pursuant to this chapter and for the village to have a right to foreclose that lien in the manner provided for mortgages or mechanics' liens under Illinois law.

Sec. 22-4. Provisions are a Condition of all Petitions, Approvals and Permits.

No petition filed pursuant to this chapter shall be considered complete unless and until all filing fees and deposits due pursuant to this chapter have been paid. Every approval granted and every permit issued pursuant to this chapter shall, whether or not expressly so conditioned, be deemed to be conditioned upon payment of recoverable costs as required by this chapter. The village may, in its sole discretion, issue stop work orders and otherwise revoke permits or permissions previously granted should a petitioner cease compliance with this chapter during the pendency of a filed or approved petition. Any person who files a petition covered under this chapter shall be obligated to execute and complete a separate reimbursement agreement which shall be provided by the village.

Sec. 22-5. Failure to Pay Recoverable Costs.

The failure to pay in full when due any recoverable cost or deposit required under this chapter shall be grounds for refusing to process a petition and for denying or revoking any permit or approval sought or issued with respect to the land or development to which the unpaid recoverable cost or deposit relates.

Sec. 22-6. Escrow Account to be Established.

At the time of filing a petition, and prior to the village's review of the same, the petitioner shall be required to establish an escrow account in compliance with this chapter, and shall be required to execute an escrow agreement in the form provided by the village. The petitioner shall be obligated to make all payments necessary to maintain such account at the level prescribed by the village. If the petitioner fails to make a payment requested by the village within thirty (30) days of such request, the village may unilaterally choose to implement any or all of the following remedies until such point in time as the petitioner has paid all amounts due and has made all payments necessary to restore petitioner's escrow accounts to the level prescribed by the village:

1. Issuance of a stop work order on any portion of the work proposed by the petition.
2. Refusal to issue further permits for building, occupancy, water hookup or other petition related work.

3. Cessation of any utility service provided by the village to any property owned or maintained by petitioner or their successors or assigns.
4. Institution of appropriate legal action to recover any and all amounts due, in which case the village will be entitled to reasonable attorney fees, costs of court and other collection costs plus statutory interest.
5. Cessation of any or all work on or pertaining to the petition by village staff, employees, consultants and agents.
6. Filing a lien against the subject property for all amounts unpaid pursuant to this chapter and to foreclose that lien in the manner provided for mortgages or mechanics' liens or as otherwise provided for under Illinois law.

Any portion of the escrow account which remains unused upon the termination of the petition or the completion of any improvement contemplated by the petition shall be refunded to the petitioner within thirty (30) days of the village's receipt of the last invoice for professional fees and costs that are or to be reimbursed out of the petitioner's escrow account.

The escrow deposit required pursuant to Section 22-6 of the Municipal Code of the Village of Durand, Illinois regarding annexation petitions under Chapter 21 Municipal Code of the Village of Durand, Illinois shall be, effective immediately, as follows:

Sec. 22-7. Termination of Obligation.

Notwithstanding any contrary provision of this chapter, the petitioner's obligation to reimburse the village for professional fees and costs, and the accompanying obligation to maintain an escrow account, shall continue until the petitioner fully satisfies all obligations to reimburse the village, and shall in no event terminate earlier than ninety (90) days after the last to occur of the following:

1. The petitioner's voluntary termination of the petition and all work, projects and developments associated therewith.

2. The satisfactory completion of the work proposed by the petition and all work arising there- from (including, in the case of petitions for annexations, all subsequent plats and the completion of construction of any structures on the annexed property and the completion of all obligations of the underlying annexation agreement).
3. The village's rejection of the petition in its entirety, and the failure of the petitioner to indicate, within ninety (90) days of such rejection, the petitioner's desire to continue working with the village towards the approval of the same or a modified petition.

After the last to occur of the foregoing conditions the village shall finalize all invoices for professional fees and costs, shall seek reimbursement from the petitioner for all such professional fees and costs, and shall, after settling all such invoices, refund any excess monies back to the petitioner.

That Section 509 of the Subdivision Regulations of the Village of Durand Illinois, *Fees*, is hereby repealed.

But not including:

Unoccupied buildings which are undergoing construction, renovation, or rehabilitation and which are in compliance with all applicable ordinances, codes, legislation and regulations, and for which construction, renovation or rehabilitation is proceeding diligently to completion.

Sec. 23-5. Determination.

Within sixty (60) days after the effective date of this Article, the Village of Durand Trustee shall evaluate all buildings in the Village he or she believes to be unoccupied on the effective date of this Article and make a determination for each as to whether the building is a “vacant building” within the meaning of Section 23-4 of this Article. The Village of Durand Trustee may determine that a building which meets any of the criteria set forth in this Section is not to be regulated under this Article for a stated period, if upon consideration of reliable, substantiated and sufficient evidence, he or she determines that regulation of the building under this Article would not serve the public health, welfare, and safety and makes written findings in support of his or her decision. The determination shall be in writing and shall state the factual basis for the determination. For buildings the Village of Durand Trustee determines to be “vacant buildings”, notice of the determination will be sent to the last taxpayer of record listed on the most recent Winnebago County tax roll. The notice of determination shall be sent first class United States mail. Failure of delivery shall not excuse a person and/or owner from complying with this Article. The Village of Durand Trustee may personally serve or cause personal service of the notice of determination. Any person making such service shall execute an affidavit attesting to the facts of service. The Village of Durand Trustee shall maintain a record of such mailing for each notice of determination sent.

The notice shall specify a date and time on which the owner shall allow for a code compliance inspection of the interior of the vacant building to determine the extent of compliance with village property, building codes, health, fire, water, and sewer codes. The owner shall pay the \$500.00 inspection fee to the Village within thirty (30) days of the inspection. An unpaid fee shall be a lien upon the premises.

The notice shall contain a statement of the obligations of the owner of a building determined to be a vacant building, a copy of the registration form the owner is required to file pursuant to Section 23-7 of this Article, and a notice of the owner’s right to appeal the Village of Durand Trustee’s determination.

Section 23-6. Appeal of Determination.

An owner of a building determined by the Village of Durand Trustee to be a vacant building as provided for in this Article may appeal that determination to the Village Board of Trustees. Such appeal must be in writing and must be filed with the Village of Durand Trustee within fifteen (15) days of the date of mailing of the notice of determination. The filing of an appeal stays the owner’s obligation to register his or her building as required by Section 23-7 if this Article. The appeal must contain a complete statement of the reasons the owner disputes the Village of Durand Trustee’s determination, must set forth specific facts in support thereof,

and must include all evidence the owner relies upon to support the appeal. The Village Board of Trustees will decide the appeal on the basis of facts presented by the owner in his or her written appeal and the Village of Durand Trustee's written determination.

1. The burden is upon the owner to present sufficient evidence to persuade the Board of Trustees that had the evidence been known to the Village of Durand Trustee at the time the Village of Durand Trustee made the determination, the Village of Durand Trustee would more likely than not have determined that the subject building was not a "vacant building" within the meaning of this Article.
2. The Board of Trustees will send written notice of its decision to the owner within twenty-one (21) days of the Board of Trustees' receipt of the appeal. The Board of Trustees may, but is not required to, seek additional information from the owner. The Board of Trustees may, upon written notice thereof to the owner, take no more than ten (10) additional days to decide the appeal if it determines that such additional time is required for consideration of the appeal.
3. An owner who wishes to challenge applicability of this Article to his or her building without the Village of Durand Trustee's determination having been made, must set forth specific facts to support non-applicability in a writing to the Village of Durand Trustee. In the event the Village of Durand Trustee determines that the subject building is a "vacant building", the owner will have the right to appeal the Village of Durand Trustee's determination to the Board of Trustees as provided for herein.

Sec. 23-7. Obligation to Register.

The owner of a building who knows, or from all the facts and circumstances should know, that his or her building is or has become a "vacant building" within the meaning of this Article after the effective date of this Article or the owner of a building, which the Village of Durand Trustee determines at any time to be a "vacant building", or the owner of a building whose appeal from the Village of Durand Trustee's determination has been denied by the Village Board of Trustees must take the actions provided for in this Section within thirty (30) days after either the date of the Village of Durand Trustee's notice of determination or occurrence of the facts that would cause a reasonable person to believe that the building was a "vacant building", or denial of the appeal, whichever is applicable. Registration does not exonerate the owner from compliance with all applicable codes and ordinances, including this Article, nor does it preclude any of the actions the Village is authorized to take pursuant to this Article or elsewhere in this Chapter.

1. *Registration Requirements.*
 - a. Register the building with the Village of Durand Trustee, on a form provided by the Village of Durand Trustee and pay the annual \$200.00 annual non-prorated vacant building registration fee. The form will include, at a minimum, the name, street address, and telephone number of the owner, the case name and number of any litigation pending concerning or affecting the building, including bankruptcy cases, and the name, street address, and telephone number of all persons with any legal interest in the building or the premises. The form will require the owner to identify a natural person 21 years of age or older who maintains a permanent address in Winnebago County, Illinois, to accept service on behalf of the owner with respect to any notices the Village of Durand Trustee sends pursuant to this Article or service of process in any proceeding commenced to enforce any provision of this Article, and file with the Village of Durand Trustee on the registration form, the name, address, and telephone number of said person. A street address is required. A post office box

is not an acceptable address.

- b. Renew the vacant building registration each year on the anniversary date of the first filing for the time the building remains vacant and pay the required \$200.00 annual fee; and
 - c. File an amended registration within fifteen (15) days of any change in the information contained in the annual registration. A new registration is required for any change in ownership whatsoever.
2. *Notice; Inspection.* The form will require the owner to indicate his or her “acceptance of notice by posting” consenting to service of notices sent or required to be sent, pursuant to this Article, by posting on the building if the owner fails to renew the registration if required, or maintain as current with the Village of Durand Trustee the information required regarding the person designated to accept notice and service of process.

The owner will allow for a code compliance inspection of the interior of the vacant building and must pay the \$500.00 fee therefore within 30 days of the inspection. Such inspection will determine the extent of compliance with Village property, building codes, health, fire, water, and sewer codes. The Village will send the inspection report to the owner within thirty (30) days.

3. *Insurance.* Obtain liability insurance and maintain such insurance for as long as the building is vacant, and file evidence of such insurance with a Village of Trustees as follows:

\$500,000.00 for a vacant residential building of one to three units;
\$750,000.00 for a vacant residential building of four to eleven units;
\$1,000,000.00 for a vacant residential building of twenty-three to forty-eight units;
\$2,000,000.00 for a vacant residential building of more than 48 units; and
\$2,000,000.00 for a vacant manufacturing, industrial, storage, or nonresidential commercial building

4. *Vacant Building Plan.* At the time a building is registered as required in this Article, the owner must submit a written vacant building plan. The Village of Durand Trustee may prescribe a form for the plan. If the owner fails to submit the plan as provided for by this article, the Village of Durand may determine an appropriate plan for the vacant building. The plan will contain the following as a minimum:

- a. A plan of action to repair any doors, windows, or other openings which are boarded up or otherwise secured by any means other than conventional methods used in the design of the building or permitted for new construction or similar type.
- b. For buildings and premises thereof which are determined by the Village of Durand Trustee as being or containing public nuisances, as defined in Section 23-4 of this Article, then the vacant building plan will contain a plan of action to remedy such public nuisance(s).
- c. A time schedule identifying a date of commencement of repair and date of completion of repair for each improperly secured opening and nuisance identified by the Village of Durand Trustee.

- d. When the owner proposes to demolish the vacant building, then the owner must submit a plan and time schedule for such demolition.
 - e. A plan of action to maintain the building and premises thereof in conformance with this Article.
 - f. A plan of action, with a time schedule, identifying the date the building will be habitable and occupied or offered for occupancy or sale. The time schedule must include date(s) of commencement and completion of all actions required to achieve habitability. No plan which provides for compliance with this Article or, which will not, as determined by the Village of Durand Trustee, achieve such compliance, within one year, in the case of a vacant boarded building, and two years, in the case of a vacant, unboarded, and code compliant building will be approved.
 - g. All premises upon which unoccupied or vacant buildings are located and the exteriors must at all times be maintained in compliance with this Article.
 - h. Exterior lighting according to standards established by the Village of Durand Trustee.
5. *Signage.* Affixed to any building which is boarded, no smaller than two feet by two feet and compliant with the Village's sign regulations and providing the following information: the name, address, and telephone number of the owner, and in addition, for buildings that re the subject of a foreclosure action, the name, address, and telephone number of the plaintiff and the plaintiff's attorney, if any, in the foreclosure action. The sign must be placed so that its message is legible from the public right-of-way.
6. *Approval of plan.*
- a. *Review building plan.* The Village of Durand Trustee will review the proposed vacant building plan in accordance with the standards below. The Village of Durand Trustee will send notice to the owner of the vacant building of his or her determination.
 - b. *Standards for plan approval.* In considering the appropriateness of a vacant building plan, the Village of Durand Trustee will include the following in his or her consideration and will make written findings as to each:
 - i. The purposes of this Article and intent of the Village Board of Trustees to minimize the time a building is boarded or otherwise vacant.
 - ii. The effect of the building and the proposed plan on adjoining property.
 - iii. The length of time the building has been vacant.
 - iv. The presence of any public nuisances on the property.
 - v. The likelihood that the plan or portion(s) thereof will prevent or ameliorate the condition it is designed to address.

7. *Authority to modify plan, right of appeal.* The Village of Durand Trustee will, upon notice to the vacant building owner, have the right to modify the vacant building plan by modifyin the dates of performance, the proposed methods of action, or by imposing additional requirements consistent with this article he or she deems necessary to protect the public health, safety, or welfare.
8. *Failure to comply with plan.* Failure to have an approved plan within 30 days of filing the registration from or failure to comply with the approved plan will constitute a violation of this Article subjecting the owner of the building to penalties as provided in this Article and to any remedies the Village may avail itself of as provided for herein and elsewhere in this Article, including, but limited to, an action to compel correction of property maintenance violations.

Sec. 23-8. Other Enforcement.

The registration of a vacant building will not preclude action by the Village to demolish or to take other action against the building pursuant to other provisions of this Article, this Chapter, or other applicable legislation, including the activities authorized by Section 23-9.

Sec. 23-9. Property Maintenance.

- A. *Nuisance Abatement.* The Village is authorized to perform or provide for property maintenance activities to abate a nuisance caused by a vacant building, including the following:
 - a. Cutting and removal of neglected weeds, grass, tree, and bushes as authorized by Section 11-20-7 of the Illinois Municipal Code, 65 ILCS 5/11-20-7, and applicable Village ordinances and codes;

- B. *Charges for Nuisance Abatement.* The Village will have the authority to collect from the property owner the costs incurred in performing the property maintenance activities to abate the nuisances described in this Section 23-9. The Village will send a bill for the cost to the property owner, his or her agent, legal representative, or occupant in legal possession or control of the premises.
- C. *Traditional Lien Procedure.* If a bill sent pursuant to Subsection 23-9(B) of this Article is not paid in full within 30 days of the date of the bill, the Village will have the authority to file and record a lien against the property, pursuant to Section 11-20-15 of the Illinois Municipal Code, 65 ILCS 5/11-20-15. If, for any one property, the Village may combine any or all of the costs of those activities into a single notice of lien. The lien must be filed in accordance with the lien procedure established by the specific provision of which the property is alleged to be in violation or, if no such procedure exists, then the following procedure shall apply.

- a. *Notice of lien.* The Village or the person performing the service by authority of the Village, in its, his or her own name, may file a notice of lien in the office of the Winnebago County Recorder. The notice of lien will be filed within two years after the cost and expense is incurred. If, for any one property, the Village engaged in any nuisance abatement activity described in Subsection 23-9(B) of this Article on more than one occasion during the course of one year, then the village may combine any or all of the costs of those activities into a single notice of lien.

The notice of lien will consist of a sworn statement setting forth:

- i. A description of the real estate that sufficiently describes the parcel;
- ii. The amount of the cost and expense incurred or payable for the activities; and
- iii. The date or dates when such cost and expense was incurred by the Village or someone working on behalf of the Village.

After recording, the notice of lien will be sent by certified mail to the property owner, his or her agent or legal representative, or occupant in legal possession or control of the premises, and if different, to the person who received the tax bill for the preceding year.

- b. *Release of lien.* Upon payment of the cost after the notice of lien has been filed as provided herein, the lien will be released by the Village or person in whose name the lien has been filed, and the release will be recorded in the same manner as recording the notice of lien.
- c. *Foreclosure of lien.* Subsequent to the filing of the above-described lien, the Village may cause to be filed a complaint for foreclosure of such lien, or upon becoming a defendant in a pending lawsuit affecting the premises or real estate, by answer to the complaint or in the nature of an intervening petition or cross-complaint the Village may proceed in its corporate name to foreclose such lien. An action to foreclose a lien under this Article must be commenced within two years after the date of filing notice of lien. The property subject to a lien arising under this article will be sold for nonpayment, and the proceeds of the sale will be applied to pay the monies owing the Village.

- D. *Priority Lien Procedure.* The priority lien procedure described in this Subsection 23-9 (D) will apply only to costs incurred for activities performed on abandoned residential properties, as defined in Section 23-4 of this Article and is an alternative to the traditional lien authorized by Subsection 23-9 (C) of this Article. If a bill sent pursuant to subsection 23-9 (B) of this Article is not paid in full within 60 days of the date of the bill, the Village will have authority to file and record a priority lien against the property, pursuant to Section 11-20-15.1 of the Illinois Municipal Code, 65 ILCS 5/11-20-15.1, in the following manner:

- a. *Notice of lien.* The Village or the person performing the service by authority of the Village, in its, his or her own name, may file a notice of a priority lien in the office of the Winnebago County Recorder of Deeds. The notice of lien will be filed within two years after the cost and expense is incurred. If, for any one property, the Village engaged in any nuisance abatement activity described in Subsection 23-9 (B) of this Article on more than one occasion during the course of one year, then the Village may combine any or all of the costs of those activities

into a single notice of lien.

The notice of lien will consist of a sworn statement setting forth:

- i. A description of the abandoned residential property that sufficiently describes the parcel;
- ii. The amount of the cost incurred or payable for the activities; and
- iii. The date or dates when such cost was incurred by the village or someone working on behalf of the village; and
- iv. A statement that the lien has been filed pursuant to one or more of the property maintenance activities described in Subsection 23-9 (B) of this Article and authorized by 65 ILCS 5/11-20-7 (D), 65 ILCS 5/11-20-8 (D), 65 ILCS 5/11-20-23 (D), 65 ILCS 5/11-20-13 (E), 65 ILCS 5/11-31-1.01, as applicable.

After recording, the notice of lien will be sent by certified mail to the property owner, his or her agent or legal representative or occupant in legal possession or control of the premises and, if different, to the person who received the tax bill for the preceding year.

The Village may not file a lien if the lender has provided notice to the Village that the lender has performed, or will perform, remedial actions; provided, however, that the remedial actions must be performed or initiated in good faith within 30 days of the lender's notice to the Village.

- b. *Recordkeeping.* To enforce a lien pursuant to this Subsection 23-9 (D), the Village must maintain contemporaneous records that include, at a minimum:
 - i. Dated statement of a finding by the Village that the property has become abandoned residential property;
 - ii. Date when the property was first observed to be unoccupied by any lawful occupant;
 - iii. Description of the actions taken by the Village to contact the legal owner of the property, or if known, any agent of the owner;
 - iv. Statement that no contacts were made with the legal owner or, if known, any agent of the owner;
 - v. Dated certification by a Village official of the necessity and specific nature of the work performed;
 - vi. Copy of the agreement with the person or company performing the work and the rates and estimated cost of the work, if applicable;
 - vii. Detailed invoices and payment vouchers for the work;

- viii. A statement whether the work was competitively bid, and if so, a copy of all proposals submitted by the bidders.
- c. *Release of lien.* Upon payment of the cost after the notice of lien has been filed as provided herein, the lien will be released by the Village or person in whose name the lien has been filed, and the release will be recorded in the same manner as recording the notice of lien.
- d. *Enforcement of lien.* A lien under this subsection 26-215 (D) is enforceable by the Village, or entity or person who performs work on behalf of the village, at the hearing for confirmation of the foreclosure sale of the abandoned residential property and is limited to a claim of interest in the proceeds of the sale. The priority lien is superior to all other liens and encumbrances, except tax liens.

Sec. 23-10. Certification.

A certification of code compliance for vacant buildings issued by the Village and payment in full of all fees imposed pursuant to this Article are required prior to any occupancy of a vacant building.

Sec. 23-11. Boarding of Buildings.

It is the policy of the Village that boarding is a temporary solution to prevent unauthorized entry into a vacant building and that boarded buildings are a public nuisance. A vacant building may not remain boarded longer than one year unless an extension of that time is part of a plan approved by the Village of Durand Trustee. A vacant building that is not boarded and code complaint and for which boarding is determined by the Village of Durand Trustee, on the basis of police reports, citizen complaints, and other information of other type considered reliable by reasonable persons, to not require boarding to prevent unauthorized entry may not remain vacant for more than two years without an approved plan for occupancy, sale, demolition, or other disposition of the building.

Sec. 23-23. Enforcement and Penalties.

- A. Any person found to have violated any provision of this Article will be subject to a minimum fine of \$100.00 per day per violation to a maximum of \$750.00 per day per violation, in addition to any other legal or equitable remedies available to the Village. Such other remedies include, without limitation, injunctive relief, application to a court of competent jurisdiction for a receiver, demolition, or condemnation, contracting for the repair or purchase of the premises, or foreclosure of any lien the Village may have thereon.
- B. A separate and distinct offense will be committed each day a person or persons violate the provisions of this Article.
